SUMMARY

Software Engineering graduate of IITU (2026). I build Python backends with Flask and FastAPI, work with PostgreSQL, REST APIs and third-party integrations, and make Telegram bots and AI features on the OpenAI API. Looking for a Junior Python / Backend Developer role.

EDUCATION

Bachelor's degree, Information Technology (Software Engineering) 2022 – 2026
International Information Technology University (IITU), Almaty, Kazakhstan

PROJECTS

MountainRent AI / PeakRent.kz · graduation project 2025 – 2026 · completed
Python, Flask, SQLAlchemy, PostgreSQL, JWT, OpenAI API (GPT-4o-mini), Next.js

- Built the Flask backend: REST API for the catalog, bookings, reviews and recommendations, with PostgreSQL through SQLAlchemy.
- Built AI gear recommendations: scoring by activity tags, weather (OpenWeatherMap), skill level, popularity and stock, then GPT-4o-mini writes a tip for each item.
- Added an AI chat that answers from catalog data: product names, prices and stock.
- Implemented OTP and JWT sign-in, customer / manager / admin roles, and CSV export of sales analytics.
- Code: github.com/ermekov/Mountain_equipment_rental

Ken Tereze AI · Telegram bot for dealers 2026 · in progress
Python, FastAPI, PostgreSQL, SQLAlchemy, Telegram Bot API, OpenAI API

- The bot accepts dealers' window orders as PDF files and extracts sizes, quantities and materials.
- Calculates the price from a materials database of about 400 items: profiles, glass, fittings and handles.
- Replies to the dealer are generated with the OpenAI API; once the dealer agrees, the order goes to a manager in Telegram.

AI assistant for business · Telegram, WhatsApp, Instagram 2026 · in progress
Python, PostgreSQL, Google Sheets API, n8n, Telegram / WhatsApp / Instagram APIs

- Writing the backend logic in Python: one workflow engine shared by three channels.
- The assistant takes requests, answers common questions and passes the details to a manager.
- Data is stored in PostgreSQL and Google Sheets.

SKILLS

Backend: Python, Flask, FastAPI, Django, REST API, SQLAlchemy

Databases: PostgreSQL, SQL

AI and automation: OpenAI API, LLM integrations, prompt engineering, Telegram Bot API, n8n, Google Sheets API

Tools: Git, Docker, Claude Code, Codex

LANGUAGES

Kazakh: native

Russian: fluent

English: pre-intermediate (A2)

CERTIFICATES

- Prompt Engineering for ChatGPT, Vanderbilt University 2025
- AI for Everyone, DeepLearning.AI 2025
- Algorithmic Toolbox, UC San Diego 2024
- Data Structures, UC San Diego and HSE 2024
- Interactive SQL Simulator, Far Eastern Federal University, with distinction 2024
- HTML, CSS and JavaScript, Johns Hopkins University 2024
- UI / UX Design Specialization, CalArts 2024
- Python Generation, with distinction 2023
